Library Support for Kinesiology Graduate Students  
Welcome to UNLV!

I am Xan Goodman, the dedicated librarian to the School of Allied Health Sciences. I am available to meet

Kinesiology Resources
Kinesiology Subject Guide
http://guides.library.unlv.edu/kinesiology
The following subject guide links to databases, journals, research instruments and other relevant allied health/kinesiology sources to assist you with your studies.

Top Three Research Article Databases
1. CINAHL is the Cumulative Index to Nursing and Allied Health Sciences literature. Full-text linked articles are available.
2. PubMed is the ONE resource freely available to anyone in the world. It is a biomedical index containing over 26 million article citations. Remember that PubMed will link you out to full-text in other resources!
3. SPORTDiscus with Full Text includes journal articles about all aspects of sports, physical education and sports medicine.

Clinical Resources
1) UpToDate
   Expert, peer-reviewed physician written health information.
2) DynaMed Plus
   Evidence-based clinical reference tool.
3) Lexicomp
   Drug reference database.
Library Support for Graduate Students

Other Helpful Information

Bibliographic Management Tools
Take advantage of tools to help you organize your research:

1) RefWorks is the University of Nevada, Las Vegas campus wide supported tool. library.unlv.edu
2) Mendeley is a free web-based reference manager https://www.mendeley.com/

Data Sources
The University Libraries subscribes to a number of databases that contain datasets. MyResearcher offers data related to the Las Vegas area, while, DataPlanet, contains data from well-known entities such as the CDC. To learn more about data visit our:

Data & Statistics Guide http://guides.library.unlv.edu/data
Kinesiology Data & Statistics http://guides.library.unlv.edu/c.php?g=333438&p=5043246
I have compiled a range of freely available sources of health data.

Research Instruments
As your Health Sciences Librarian, I can schedule consultations to discuss library resources available in the area of research instruments. Here are a few:

- SAGE Research Methods
- Health and Psychosocial Instruments (HaPI)
- Mental Measurements Yearbook

Workshops
I have some recorded workshops from the 2016-2017 school year. I will share the links with the graduate coordinator.

Workshop topics were:

- Tools for literature review
- Introduction to PubMed
- Advanced PubMed
- Introduction to Systematic Review Research Methodology
- Introduction to Clinical Trials.gov
- Introduction to LiverTox
- Overview of National Library of Medicine Resources
- Benefits of Mendeley and RefWorks
