Other Helpful Information

Bibliographic Management Tools
Take advantage of tools to help you organize your research:

❖ RefWorks is the University of Nevada, Las Vegas campus wide supported tool.
❖ Mendeley is a free web-based reference manager

Data Sources
The University Libraries subscribes to a number of databases that contain datasets. MyResearcher offers data related to the Las Vegas area, while, DataPlanet, contains data from well-known entities such as the CDC. To learn more about data visit our: Data & Statistics Guide http://guides.library.unlv.edu/data

Research Instruments
As your liaison librarian, I am available for one-on-one consultations to discuss with graduate students library resources that include research instruments. A few useful tools for students to consider: HaPI & SAGE Research Methods.
